CLINICAL SUPPLY

From lab-scale to clinical trial batches to full-scale commercial manufacture, Servier has the expertise, technology and breadth to protect your molecule from concept to approval.

CLINICAL SUPPLY CAPABILITIES

- Regulatory CMC
- Process development and validation
- Analytical development and validation
- Microbiology development and validation
- ICH stability testing
- Clinical batch manufacturing
- Packaging of clinical trial material
- Product transfers

Process & Analytical Development

- API synthesis
- Formulation development
- Physical and chemical characterization
- Process, analytical and microbiology development and validation
- Impurity tracking and characterization
- In-process production support
- High-quality analytical data

GMP Clinical Batch Manufacturing

- Scale-up studies
- Packaging into mixed blisters or bottles
- Randomization management
- Comparator sourcing
- Worldwide distribution

Your Project Benefits From:

- Fully integrated solutions for enhanced supply chain efficiency
- A global manufacturing network to serve your trials around the world
- Flexibility to scale up from clinical to commercial supply
- Comprehensive support, from API synthesis to manufacturing and packaging of clinical trial materials through compilation of regulatory files
