

# MADRID, SPAIN

Servier was first established in Madrid, Spain in 1957. In the 1960s, the first pharmaceutical manufacturing operations started, dedicated to domestic market. In 1978, the Toledo chemical plant was built; in 1982, the Madrid functions moved to the new site.

## PRODUCTS & SERVICES

- Drug Product
- Packaging

The Spanish ICTR (International Center of Therapeutic Research) was founded in 1986.

The pharmaceutical facility in Madrid was renovated from 2005 to 2008. The processing technology and packaging equipment were renovated. State-of-the-art facilities and new technology ensure a high level of containment of the product during main processing steps.

The plant is certified in European Registration Dossiers for current Servier Group products (Procoralan® 5 and 7.5, Valdoxan® 25, Diamicron® 60, Bipreterax® 4 and 8), allowing us to export across the EU.

Export production began in 2015.
